

CS551 Advanced Software Engineering

LAB ASSIGNMENT #10

Instructor : Dr. Yugyung Lee

Teaching Assistant : Prady

Student : Fathima Shanthi James

Submission Date : 04/05/2016

Class ID : 58

Deploy the applications onto Amazon instances and share the URL

I deployed my applications on to my Amazon instances and the below screenshot shows the deployment of yard to feet conversation.

URL :

<http://aselab10-fathima.us-west-2.elasticbeanstalk.com/conversion/FeetToYard/3>

The below screenshot shows the feet to yard conversation. If there is no input values, then the result would be zero as shown in the screenshot.

URL:

<http://aselab10-fathima.us-west-2.elasticbeanstalk.com/conversion/YardToFeet>

The below screenshot shows the feet to yard conversion with proper input values.

URL:

<http://aselab10-fathima.us-west-2.elasticbeanstalk.com/conversion/FeetToYard/3>

Another screenshot for yard to feet conservation with no input values.

URL :

<http://aselab10-fathima.us-west-2.elasticbeanstalk.com/conversion/YardToFeet>

Conclusion:

I deployed my applications onto my Amazon account instances successfully and shared the URL as well.
